

SUPERIOR Cashmere | DENSE LINE

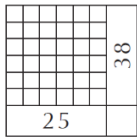

Trace & Buy: www.pamirfinefibers.ch

Yarn made of 100% pure cashmere, 6-ply, guarantee of fair production and full traceability

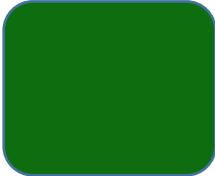

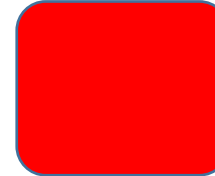

Our DENSE LINE stands for durability, resistance and low pilling. Results from independent laboratory tests for abrasion and resistance showed up to 45% higher resistance compared to similar yarns. Please note that unwashed DENSE LINE yarns have a little rougher touch - however the uniquely warm, soft and light characteristics of cashmere fibers evolve with wearing and washing. We recommend hand washing once before wearing. After washing once or twice, they develop their full volume.

The DENSE LINE SUPERIOR yarns are especially suitable for knitting accessories that can be worn every day. With 105 meters per 25 grams, these yarns go a long way. After washing once or twice, they develop their full volume.

No secrets from fiber to yarn: We place great importance on a transparent, socially fair and environmentally friendly production, paying the farmers in Kyrgyzstan a fair price for the quality of their fibers. You can find more detailed information and the complete process chain on www.pamirfinefibers.ch.

Article group	003	Gauge (10x10cm) Tip: wash gauge prior to calculating the size and do not knit too tight, as the yarn develops its full volume only after washing and wearing.	
Composition	100% cashmere, 6-ply		
Meterage	25g / ~105m		
Needle size	3 - 4		
Washing instructions	 use detergent for woolen fabrics only		
Packing size	Single balls
